SUMMARY

B.Tech Computer Science (AI & ML) student skilled in Full Stack Development, Machine Learning, and AI-powered web applications using Python, JavaScript, TypeScript, and Java. Experienced in building healthcare analytics dashboards, recommendation systems, and scalable SaaS products using React, Next.js, FastAPI, Flask, SQL, and MongoDB. Passionate about problem solving, REST APIs, LLM integrations, and real world technology solutions.

EDUCATIONAL QUALIFICATIONS

B.Tech — CSE (AI & ML) **Jul 2023 - Jun 2027**

- JECRC University, Jaipur

Senior Secondary **Jul 2022 - Jun 2023**

- Delhi Public School, Gwalior

PROJECTS

Intelligent Fall Risk Healthcare Dashboard

Python | Flask | Scikit-learn | JavaScript | Chart.js | Machine Learning | REST APIs | HTTP

- Developed an AI-powered healthcare dashboard using Logistic Regression to predict patient fall risk from synthetic clinical data, enabling early risk assessment and clinical decision support.
- Designed and integrated Flask REST APIs with interactive Chart.js visualizations to provide real-time patient monitoring, clinical insights, and healthcare analytics.

FINDtech — AI Laptop Recommendation Platform

React | FastAPI | TypeScript | MongoDB Atlas | Tailwind CSS | Scikit-learn | Machine Learning

- Built an AI-powered laptop recommendation platform that delivers personalized device suggestions based on user requirements using machine learning algorithms.
- Implemented a scalable full-stack architecture with React, FastAPI, and MongoDB Atlas, featuring secure authentication, laptop comparison, and analytics dashboards.

SERVE — Affordable Healthcare Access Platform (Currently Building)

Healthcare Analytics | Artificial Intelligence | LLM APIs (OpenAI/Anthropic) | Prompt Evaluation | Cost Optimization

- Developing an AI-assisted healthcare platform to improve access to affordable medicines and low-cost online consultations through a user-friendly digital experience.
- Designing intelligent features including LLM-based prescription analysis calling OpenAI API with prompt evaluation test sets, generic medicine recommendations, and medicine comparison.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, SQL, Java, C, C++.
- **Frontend Technologies:** HTML, CSS, React.js, Next.js, Vite, Tailwind CSS, Framer Motion.
- **Backend Technologies:** Flask, FastAPI, REST APIs, HTTP, JWT Authentication.
- **Databases:** MongoDB Atlas, SQL (PostgreSQL & Relational Databases).
- **Machine Learning & LLMs:** Scikit-learn, LLM APIs (OpenAI / Anthropic), Prompt Evaluation (test sets, scoring), Logistic Regression, Recommendation Systems, Data Preprocessing.
- **Cloud & Platforms:** Microsoft Azure, Git, GitHub (Pull Requests), VS Code, Postman.
- **Core Concepts:** Full Stack Development, API Integration, Dashboard Development, ML Experiments, Responsive Web Design.

Certifications, Achievements & Hackathon Participation

- **Smart India Hackathon 2025** — Developed a Secure Data Wiping System for Trustworthy IT Asset Recycling (SaaS) focused on secure digital disposal and data privacy.
- **National Healthcare Hackathon 2026** — Built an AI & ML-based Patient Fall Risk Prediction System (SaaS) for patient safety monitoring and healthcare analytics.
- **World Robot Olympiad(WRO)** — Designed a Humanized Arduino-Based Robot with obstacle avoidance and neural intelligence concepts for intelligent home cleaning and robotics automation.

Leadership & Volunteer Experience

- **JUverse, JECRC University** — Media Lead.
- **AceHacks x JECRC Hackathon** — Management & Team Lead (2 Editions).
- **SMC Summit Jaipur** — Photography & Media Lead.
